Tuning In on the Heart

A SMALL device which enables a physician to listen-in to the sounds of the human heart magnified one hundred times, has recently been placed in experimental use, according to an announcement by the Northern Electric Company, Limited, in Montreal.

The device is an Electrical Stethoscope, based upon the telephone principle with the heart doing the "talking". Originally it was developed for a medical student whose poor hearing prevented him from using the ordinary stethoscope; its success, however, aroused immediate interest among physicians whose hearing is becoming dulled, and those whose practice takes them into noisy places. Moreover, it is found most useful in diagnosing pathological conditions of the heart, as by simply throwing a switch, high or low tones may be emphasized or eliminated, as desired, thus segregating the sounds peculiar to certain diseases for more careful attention.

The entire stethoscope weighs less than a full instrument case and is about half the size, using two "Peanut" Tubes and miniature transformers. It forms a striking contrast to the larger hospital type model which was earlier developed by the Bell Telephone Laboratories, and is used for auditorium demonstrations and at the largest hospitals where almost an unlimited number can listen-in at the same time.

Pictures—Upper: The "Peanut" tube. A specialist using portable electrical stethoscope listens to a patient's heart in a well-known hospital on this continent.

Lower:—The S-wave amplifying tube, and the large stethoscope in which several such tubes are used. The hospital type electrical stethoscope being used by medical students.

FARMERS, GET YOUR SUPPLY OF MONO CALCIUM PHOSPHATE ANIMAL BUILDER

from J. H. McLAUGHLIN, SPRUCE GROVE

Stock always on hand. For all classes of live stock. On basis of strength this is cheapest mineral supplement you can buy.

DON'T BUY IN THE DARK. SPEND YOUR MONEY FOR ADVERTISED GOODS.

Sleigh Turns Turtle

A farmer from the Golden Spike district had some hard luck on Saturday last, while engaged in hauling a load of his grain to the Gillespie elevator. To avoid the bare granolithic crossings on Main street, where the sledding is poor, the farmer decided to make a detour by Meridian road and thru the stockyards. He had just got to the hollow at the old C.N. crossing when the sleigh and load slithered from the icy grade to the ditch, dumping out the grain.

Some willing hands in town helped get the sleigh back on the road, and when the farmer got this re-loaded and arrived at the elevator, he figured he had lost only about 5 bushels. The farmer's horses were not shed.

The C.G.I.T.

A special meeting of the Junior and the Senior Canadian Girls in Training was held last week in the local United church, in honor of Miss Constance Smith, secretary of the C.G.I.T. groups in Alberta, who gave an interesting talk on the 20 years growing of the C.G.I.T. Last week was national Canadian Girls in Training week and Provincial Finance Campaign, inaugurated Sat. Feb. 2 and continued to Feb. 13. Over 4400 girls are registered in these groups in this province.

A dainty lunch was served at the close of the meeting.

All members of the Junior and Senior clubs were present, and also their mothers.

Winners at Cards.

The card party held at the home of Miss Ida Zucht on Tuesday last was a great success. A charming lunch was served which was followed by the awarding of the prizes to: Ladies, Mrs A Van der Schaaf 1, Miss Emma Fischer 2, Men, H Pailer 1, Herb Parker 2. Among those present were—

Ida Zucht
Emma Fischer
Violet Goertz
Mary Campbell
Mrs van der Schaaf
Margaret Pailer
Murray Barnes
Wilfrid Staffler
Otto Detzner
Herb Parker
A van der Schaaf
Henry Pailer

A Poultry Plebiscite.

Whether or not, the poultry industry of Alberta will come within the provisions of the Natural Products Marketing Act is to be determined by a vote of poultry producers. Balloting on the proposed Alberta Poultry Marketing Plan will be held during the week starting on Monday next, February 18th. All producers having flocks of 25 or more birds, including hens, turkeys, ducks, geese, are urged to register their opinions regarding this plan by applying at their nearest postoffice for the necessary forms. Ballots must be mailed by the poultry producers not later than Sat. Feb. 23 in order to be considered.

HARDWICK'S THE HOUSE OF QUALITY.

Pillow Slips; Mill Ends Sheetings, Columbia Drapery, Bleached Cottons, Grey Cottons, etc.; Specials especially purchased for us. Quantities limited. Please shop early.

36-inch Unbleached Cotton, bought direct from Wabasso Mills; very good weight and free from dressing. Special at 2 yards for 25c.

42" Plain Hemmed Pillow Slips of good quality cotton; regular price on this line from Wabasso has been a lot higher; while these last the price is, per pair 49c.

36-in. Columbia Drapery Cloth. in many designs and shades; suitable for curtain drapes, upholstery, etc. Per yard 25c.

Fancy Printed English Ticking. in shades of blue, pink, green; at the ridiculous price of only 15c per yard.

Get It at HARDWICK'S.

The Major Problem

Surfeited and perplexed by the multitude of theories advanced as to the underlying and basic cause of this world economic depression, and equally surfeited and perplexed by the multitude of suggestions, ideas and plans advanced as the only means whereby the depression can be ended and a permanent cure effected, tens of thousands of people are becoming callous and skeptical of all economic doctrines. More and more people are asking themselves whether this very large problem, vital to the welfare of every individual and to the very existence of the nation and the civilization of the world, is being approached from the right angle.

To an ever increasing extent people are asking whether the provision of old age pensions to prevent poverty and suffering in old age is the solution, or whether that solution is to be found in the creation of conditions whereby men and women can through their own efforts and by shift and saving make necessary provision themselves for their declining years. People are inquiring whether the provision of this and that Government maintained social service to provide for their needs—and all provided for out of taxation—is not merely attempting to cover up "sore" and "doctor" the patient, instead of making the patient well and capable of caring for himself.

People are thinking and asking whether it is not true that, just so long as taxes are piled upon taxes to provide for these social services, the very burden of those taxes is operating to make it impossible for them to take necessary care of themselves and families and make wise provision for their future.

Mankind must work, and produce, and save against the time when their working days are over. In a word, the business of the world must be carried on, and the more business that is transacted, the more it is produced and exchanged for other products, the better it is for all concerned. Consequently, the fewer restrictions imposed upon the carrying on of the world's business, the better. This great truth is sinking deeper into the minds of men.

Therefore, without further comment, we quote an editorial article appearing in one of Canada's most widely circulated magazines, a publication having no political party affiliations, but which discusses Canadian and world problems in a fair and impartial manner. Under the title appearing above, it says:

"These are the days in which we are regaled or surfeited with economic theories—some ancient and some modern, some untried and some exploded, some original and some borrowed, some having and some still-born, some springing like Minerva, full-armed from the head of Jupiter, others old and decrepit no longer fitted for service in a changed world, some that promise better social conditions and more enduring prosperity, and others that if followed would surely lead to anarchy and moral ruin. It may be profitable to consider some of these theories at another time. To-day it is more fitting that we should concern ourselves with a concrete problem—one that is growing to be more and more serious, and which must be solved if any of the economic theories now advanced can be rendered workable.

"The basic industry in Canada is agriculture. The basic product in agriculture is wheat. The basic need in the wheat industry is marketing. The basic condition of marketing is exchange values. The basic condition of exchange is open trade. That is lacking at the present time. For four years we have deliberately closed the door. We have thereby encouraged countries which might have exchanged goods with us to grow their own grain. Now we are shut out—some people say forever. True, of late there has been an attempt to undo the mischief, but there has been no apparent success. An accidental shortage of food for stock in the United States made it possible to dispose of some low-grade products, but the granaries are still filled with the best the country has produced. The figure has been given as 260,000,000 bushels. We do not say this in correct, but the exact figure is not essential. Should we sell 4,000,000 bushels a week from now till harvest we should yet have some in store. Some weeks we cannot hope for any such sale as that.

"It is beyond our wisdom to say which is better—to hang on to the surplus in the hope of better days, or to dump a lot on the market at greatly reduced prices in hope of clearing the way for next year's supply. That is the problem for Mr. McFarland, the government, and the farmers to settle.

"Yet it is a major problem. There is nothing to be gained by side-tracking it in economic general theories. They need to be discussed without doubt but just now they are secondary. The first problem for Canada is the restoration of world trade. This means the re-writing of the tariff schedule. Is our government prepared to re-write it? Is Mr. Stevens prepared? Is the opposition?"

The "Lift" and Energy of Cod Liver Oil

PLUS GREATER EFFICIENCY

Vitamins A and D, abundantly found in Scott's Emulsion, bolster up tired, winter-worn bodies, restoring vitality and strength. But Scott's Emulsion gives you more: Emulsionification—the minute breaking up of the particles—making for quicker assimilation and digestion. Yet none of the virtues of pure cod liver oil are lost. One of the PLUS values you get only in Scott's Emulsion.

The Baby Airplane

Machine Produced in England Weighs Only 190 Pounds

We have had baby grand pianos, and baby automobiles, and have had jokes poked at the baby Auston, but now comes the baby airplane. A baby aero engine has been produced in England, capable of developing a hundred horsepower and weighing only 190 pounds. The engine is fitted in an "upside-down position, allowing the pilot a clear field of vision. Self-starters are fitted with it, so that the pilot climbing in, merely touches a button and away goes the baby machine like the starting of a motor car. Many of us may yet live to see these babies of the air tickle as mid-gets in the summer time.

Perfect Engineering

Crew Drilling Tunnel From Opposite Sides Met In Centre

A direct bull's-eye was scored by two tunnel excavation crews on the Cotuit River aqueduct recently when they met in the centre of a mountain after having drilled from opposite side for 17 months.

The bore was 3.8 miles long, 17 feet in diameter and represents the first major section of tunnel to be completed on the project, by which southern California municipalities seek to augment their water supply. Four shorter tunnels have been completed.—Christian Science Monitor.

HIS LUMBAGO HAS NOT COME BACK

Keeps Free Of It With Kruschen

There can be no doubt about the effectiveness of this man's success against lumbago. Read his letter:

"About four years ago, I had a bad attack of lumbago. After being in hospital for two weeks taking heat treatment, I started taking Kruschen Salt. Since then I am happy to say, I have not been troubled with lumbago. I shall still continue taking Kruschen to be sure the lumbago won't come back."—A. C. C.

Why is it that Kruschen is so effective in keeping lumbago at bay? Simply because it gets right down to the root of the trouble, and removes the cause, which is an impure bloodstream. The six salts in Kruschen keep the bloodstream pure and vigorous by promoting a clockwork regularity of all the organs of elimination.

Twenty Years Late

French Court Clears Family Convicted As Spies During War

Tardy vindication of the memory of a French family, two of whom died in jail for allegedly spying and aiding the enemy in war time, was granted on Jan. 19 in a military court. A total of 28,000 francs in damages (\$1,850) was awarded to surviving members of the family of Louis Moreau, who had been fighting for twenty years to clear their name.

Moreau and two of his sons were sentenced at the time to penal servitude in French Guiana, while his wife got a prison sentence for allegedly signalling to Germans with a bicycle lamp. Moreau and his wife died in jail. The two sons later were pardoned by a post-war premier as victims of "war hysteria."

The court decided that the light flashes seen at Moreau's house had not been proved to be signals, since the Moreaus did not know how to send code messages.

A Real Brainwave

Chinese Warlords Impose "Friendship Tax" To Raise Money

Warlords of the province of Szechwan, in China, found when they discussed ways and means of filling their empty treasure chests that there was nothing left on which to impose new duties. Then one of them had a brainwave—why not a "friendship" tax? Now all civilians have been ordered to pay a new levy which will guarantee the friendship of the soldiers. They have been warned that if the "good feeling tax" is not paid cheerfully and promptly, "immunity from the smutty of the army cannot be promised."

HOW TO RELIEVE YOUR COLD ALMOST AT ONCE

Follow Simple Directions Here For Quick Relief

1. Take 2 Aspirin tablets.

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 Aspirin tablets in a glass of water and gargle. This eases the soreness in your throat almost instantly.

When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors as the quick, safe way.

Results are amazing. Ache and distress go immediately. Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly. Your cold is relieved "quick as you caught it!"

All you do is take Aspirin and drink plenty of water. Do this every 2 to 4 hours the first day—less often afterward . . . if throat is sore, the Aspirin gargle will ease it in as little as 2 minutes.

Ask your doctor about this. And be sure you get ASPIRIN when you buy. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

New Chemical Formula

Discovery May Help In Treating Nerve Disorders

Columbia University has announced discovery of the chemical formula of Vitamin B, an epochal step toward preservation of health.

B is the nerve vitamin, without which nerves go to pieces. The discovery gives hopes of more effective treatment of nerve disorders.

Until now Vitamin B has been available only from foodstuffs such as tomatoes, spinach, legumes, eggs, yeast, liver, kidney and other glandular tissues. Its extraction was difficult and it has not been obtained entirely pure.

Synthesis will produce the pure vitamin, and it is expected to do so in virtually unlimited quantities. The formula was discovered by Robert R. Williams of Columbia.

The atoms composing the vitamin are carbon, nitrogen, hydrogen, oxygen and sulphur. This fact has been known for a long time. The discovery is how to hook them together so that they will be Vitamin B.

Key West, Fla., has one street which runs from the Gulf of Mexico to the Atlantic ocean; it is Duval street.

Portugal Has Problem

No Room For 282 Convicts Sent Back From Colonies

Two hundred and eighty-two convicts—and nowhere to put them. This is the problem which is puzzling the prison authorities in Portugal. The convicts who have arrived in the country from Portuguese colonies, from which they have been sent as convicts from Portugal, can no longer remain in the colonies. Many hundreds are to return to their native land, in accordance with the provisions of the Colonial Act. The 282 who have arrived cannot be accommodated in Lisbon's prisons as these are already overcrowded. They are to be placed in "concentration camps." Many are criminals of the worst type.

The Overseas Daily Mail says P. C. Walter J. Taylor, who has just retired after 26 years' service in the Southampton police, is believed to be the man who fired the last shot in the Boer War—and by mistake, injured a British corporal.

New York has been the largest city in the United States from the time of the very first census, 1790, when it had 33,000 inhabitants.

IN ONE POT

It isn't possible to cook such strong-flavored vegetables as cauliflower, turnips and onions all in one pot without intermingling of flavors of odor. You simply wrap them in Canapar Cookery Parchment.

That not only keeps moisture of odor—but it causes the vegetables to retain all their own natural goodness and flavor. Vegetables cooked the Canapar way are most delicious.

Bake or boil fish in Canapar, too. And like seal ones with Canapar. Serve hot. Increase goodness and flavor. End job of seasoning fish. And eliminate pot scouring.

Government Proposes To Launch Comprehensive Program To Deal Effectively With Drouth Problem

Backed by the best information of experts of the department of agriculture, the Dominion government is preparing to launch a program early this spring which it hopes will deal effectively with the critical problem of drouth areas of the three prairie provinces. Hon. Robert Weir, minister of agriculture, outlined plans in the House of Commons.

The program will be administered by the department of agriculture as a solely federal undertaking. An advisory committee, Mr. Weir told the house, of successful ranchers, wheat farmers and business men, would be appointed to assist the department in conduct and development of the plans.

For four years department experts have been studying conditions which affect fully 10,000,000 acres in the three provinces. Figures submitted by the minister showed that in 1933 drouth affected 11,435,000 acres to such an extent that it produced less than five bushels of grain to the acre.

Plans the government will put in operation, it is claimed, will change the entire landscape in many sections of Saskatchewan, Alberta and Manitoba. The survey has been completed and all details worked out.

The kernel of the project will be demonstration areas selected in various sections of dried-out districts. Farmers of a dried-out township will be invited to co-operate. If they agree, and those who have worked on the plan may be offered such terms that they will be glad to agree, then the administration of the township will be taken over and managed as one unit.

The farmers will form a committee which will have advice not only of agricultural experts but the best engineering advice the department can obtain. A township is 36 square miles. This is regarded as a sufficiently large area to counteract local conditions and serve as a demonstration to all adjacent townships.

Administration of the area will decide what shall be done. Blocks 25 acres in extent will be planted to trees at strategic points to provide shelter for livestock, hold snow and shelter ponds and lakes constructed for water storage. Approximately 7,000,000 seedlings will be available from forestry stations of Indian Head and Sutherland, Sask.

The Dominion will provide trees, grass seed, fodder where necessary, in developing mixed farming or ranches and other facilities. The farmers will provide labor and be entitled to all the revenue. It is believed by organized methods the farmers will be able to make much more than by individual efforts. Water storage will be provided on every farm.

Plans call for eight demonstration areas in Saskatchewan, two or three in Alberta and one or two in Manitoba. Farmers outside the demonstration areas will be assisted to improve their farms in a manner based on the experiences of the demonstration areas.

Preparation for this step has been going on for the last four years, Mr. Weir explained. In addition to seedlings, tons of carraigans seed will be planted. This is a tree of the pea family growing about 15 feet high and forming effective wind breaks and hedges. Trees planted will be cottonwood, willow, poplar, spruce and jack pine.

What the department is relying on most to reclaim dried-out areas is created wheat grass. This grass keeps alive with less moisture than any other form.

It ranks with Russian thistle, the weed that grows on land when everything has been burnt. For some years this type of grass has been developed and the seed will be available in considerable quantities to build up ranches.

More than 100 small dams will be built under the program and proposals to undertake much larger projects are under consideration.

"It is generally conceded that this

area should be divided into three regions, one suitable for ranching, one suitable almost entirely for the growing of wheat, and the intermediate region lending itself to a mixture of the two," said Mr. Weir.

"It is proposed to select a number of fairly large areas in each of these regions for the purpose of demonstration and research. Because these areas are under the jurisdiction of the provinces, it will be necessary to receive the whole-hearted co-operation of the farmers within the areas selected, this co-operation, by agreement, to extend over a period of years."

Dressed Poultry Regulations

Details Of Amendments Respecting Grading And Marking

The recent amendments to the regulations respecting the grading and marking of dressed poultry consist of the substitution of a new section (No. 7) for the old one, and the addition of a new section (No. 16). Section 7 deals with the stencilling and marking of boxes containing poultry. It reads as follows: (1) All boxes containing poultry to which these regulations apply shall be clearly and legibly stencilled on the outside of at least one end in block letters not less than three-quarters of an inch in length so as to show correctly;

(a) In the left upper corner, the number of birds in the box. This mark may be omitted in the case of a box containing 12 birds, the recognized pack.

(b) In the left lower corner, "Tagged", if, and only if, all the birds in the box are tagged. In this corner may also be shown the gross weight of the package.

(c) In the right lower corner, the net weight.

(d) In the centre, the kind and sub-kind of poultry on the first line; the class and grade on the second line.

(e) In instances where the kind and sub-kind are partly designated by the same word, the sub-kind name shall be used.

(f) In the branding of turkeys, both kind and sub-kind shall be shown. The sub-kind may be indicated by the first letter or letters of the sub-kind.

(g) Stags and roosters must be branded as such.

(2) No person shall place on any such box any mark or design other than those required by this regulation, except such as may be authorized in any case by the Dominion Minister of Agriculture.

The other new regulation, which refers to the inspection, grading and marking of dressed poultry for export, has been added as section 16 as follows:

(1) No person shall either by himself, or through the agency of another person, ship dressed poultry for export from Canada unless the same has been inspected and certified by an inspector at point of shipment and is graded and packed and the containers marked in accordance with these regulations, and each individual bird marked with a tag bearing the class and grade as specified in these regulations.

(2) The Minister may from time to time prescribe the form, colour and lettering of tags used to mark birds for export, and the place and method of attachment.

(3) Upon the end of the box stencilled in accordance with section 7, no mark or other designation shall appear except those required or allowed by this section.

How China Does It

To the bright officials of the Chinese ministry of railways goes the palm for inventing a system which puts a stop to argument with parents over the age of children. The Chinese in the past have followed the Canadian system of selling half-fare tickets for youngsters under a certain age. Now, after much trouble, children pay fare according to height.

Protecting Food Products

New Insecticide Protects Food By Fumigating Process

Since the introduction of wax paper and cellophane considerable progress has been made in preventing deterioration and infestation of food products by insects subsequent to manufacture. Many manufacturers now fumigate their products after packing, and a new insecticide, which consists of one part ethylene oxide to nine parts carbon dioxide, is coming into use. The products packed ready for market are placed in a vault into which the required amount of fumigant is introduced. In this way food products, cereals, candies and other commodities are rendered insect free at the time of shipment from the factory or mill. No odour is imparted to the materials. The only drawback to this treatment according to officers of the Dominion Department of Agriculture who have had ample opportunity to test this gas thoroughly during the past two years, is the cost. However, with extended use, this objection will be obviated. The fumigant is non-poisonous to human beings, is non-inflammable, and may be used without injurious effects in the control of insects infesting various materials. It was first investigated and developed by research workers in agriculture.

Uncommon But Not Rare

When a Toronto man found himself two or three inches shorter than he had been, he reported to a hospital to see what was causing the shrinkage. It was found he was suffering from Paget's disease, an uncommon but not rare malady. The disease is characterized by deformities and compressions of the bones which result in loss of height. Many cases with a shortening of six to eight inches are on record.

Twice as many babies in the United States survive their first year, as compared with conditions 25 years ago.

The SNAPSHOT GUILD STUDY YOUR COMPOSITION

It is quite obvious that pictures of groups of people, or animals, such as the horses shown above, should be taken with the camera in a horizontal position, while arches, high waterfalls, etc., should be vertical.

Newspaper cameramen are sometimes sharply criticized by those who consider photography as an art, for various faults in composition, lighting, shadows, etc. These critics may be right but they do not stop to consider that the news cameraman must take his picture when he can get it and often on the run. It's the picture of an individual or action he is after and heaven help him if he returns to his city editor and says, "Sorry chief, but I didn't get that picture of the mayor being strangled. The sun was in the wrong position, the shadows terrible and the mayor was in an atrocious pose when he was struck." Ooh!—Shudder to think of what would happen to that cameraman!

There is one point, however, we can all learn from the news cameraman and profit by it in taking more interesting pictures. It is this. Include only the principal subject in a picture. In other words, if you are taking a picture of an individual or a group, focus the lens on the principal subject and forget about the background. If you have regard to the surrounding scenery, building, or whatever it may be, unless the background is of some importance and is part of the story.

If you are taking a landscape picture determine before you "shoot" the most attractive part of the scene concentrate your focusing on that spot. Two pictures showing two well composed and attractive scenes are worth many snapshots with innumerable points of possible interest. Thus there is the shape of the picture to consider. First of all this is controlled by the way the camera is held—vertically or horizontally.

Proposed Ocean Airship Line Which Will Seek World-Wide As Well as Atlantic Ocean Trade

1935 Hatchery Regulations

Only One Alteration Made From That Of 1934

When only a few chicks are to be raised, and time is not an important factor, natural methods may be used, but where chicks are to be raised commercially and time is an important factor, artificial methods are advised. For this reason, the Dominion Department of Agriculture has released and brought up to date circular 76 which deals with the brooding and rearing of chicks.

With reference to the rearing of chicks under the hatchery regulations, breeders will note that, so far as the rules and regulations of the hatchery approval policy for the 1935 season are concerned, only one alteration has been made from those of 1934 through the addition of rule 13. This has been inserted to protect provinces which have asked for proclamation of the hatchery regulations and are hatching only from approved blood-tested flocks. The rule is as follows: No approved hatchery shall ship chicks into any province which has included blood-testing in its flock approval policy and where the hatchery regulations are in effect, except approved hatcheries using only eggs from blood-tested flocks.

Bachelors Wanted

The United States army announces it is seeking 33 bassoon, oboe and trombone players for army bands in Panama and Hawaii. Only bachelors need apply.

It is thought likely that the Arabs acquired the ancient art of paper making when they took captive some Chinese paper makers.

While news dispatches and photographs tell a fast-paced world of progress in building the British superliner Queen Mary and the Great French ship Normandie, other reports forecast a competition which would take away much of the importance and perhaps some of the bitterness of this subsidized battle for supremacy in shipbuilding. With the Graf Zeppelin showing profits on its South American trips, Germany is preparing to make a bid to keep its "A-deck" passengers by turning to the air line.

From Berlin comes word of a proposed ocean airship "line" which will seek world-wide as well as Atlantic ocean trade. Work has already begun on a new Zeppelin terminal at Frankfurt-am-Main. It is on the Rhine Valley and closer to European centres than Friedrichshafen, the old port. Fast airplanes service to all parts of Europe is planned. Another port of call is promised for Seville, Spain.

From Washington, a dispatch reports that Dr. Hugo Eckener, famous commander of the Graf, is in the capital to confer with government officials for temporary use of airship moorings at Lakeside, Cape May and Miami. He is enthusiastic over the possibility of Washington as a trans-Atlantic air terminus. This last, in itself, is an interesting commentary on the shift of importance from New York to the nation's capital. In travel, centres of commerce rather than deep-water harbor facilities will be the important factor.

Thus Germany, finding her fast liners, Bremen and Europe, threatened by the two luxury vessels and already challenged by Italian craft, proposes to keep the cream of passenger, mail and express business by turning to the air. If the new airships can duplicate the performances of the Graf for fast safe crossings and profit, the project has possibilities of success. Chances will then have to take to the air, too, if they wish to compete for the mythical "Blue Ribbon on the Atlantic," and water-borne ships will rip out staterooms to make cargo holds.—Christian Science Monitor.

Tree Planting in Alberta

Distributing Trees To Farmers Who Have Wood Lots

Tree planting in Alberta continues on an extensive scale, and more than 100,000 white spruce trees and some 8,400 poplars will be available for distribution in the spring from the provincial nurseries at Oliver, according to an announcement made by the forestry branch of the Alberta Department of Lands and Mines. These trees will be distributed on the plan adopted two years ago to farmers who have wood lots or to schools, community centres, etc. Last year some 34,000 trees of various kinds were distributed from the nurseries to 228 different sources which included 163 farmers, 15 schools, 13 institutions, and 14 municipalities.

New Fruit Commissioner

Lieut.-Colonel Roy L. Wheeler, O.B.E., V.D., has been appointed Fruit Commissioner of the Dominion Department of Agriculture to fill the vacancy which the death of Commissioner G. E. McIntosh in August, 1934. Since 1922 Colonel Wheeler has been Fruit Transportation Specialist for the Department and his work in that connection has given him a wide acquaintance and experience with fruit growers, shippers, and with the wholesale trade generally, as well as with transportation interests throughout Canada.

Busy For A Day

There is a railway station near Bladley in England, that is used only one day a year, but then it handles several thousand passengers. It is built on the lonely moors adjoining the shooting grounds of the National Rifle Association and used only during the annual one-day shoot for the king's prize.

WORLD HAPPENINGS
BRIEFLY TOLD

Lady Willington, wife of the Indian viceroy, has issued an appeal for a special charity fund to commemorate the king's silver jubilee next May.

A grant of \$9,000 for the Canadian Legion was passed in the House of Commons. It is used to help returned men present their pension cases to the tribunals.

The sum of \$8,546.119 was collected from the excise tax on sugar from last April 1 to Dec. 31, according to a return tabled in the House of Commons.

A decline of 53,500 in the number of persons in receipt of British war pensions or allowances is shown in the latest report of the ministry of pensions. The total figure now is 1,508,000.

Sir Philip Sassoon, British under-secretary for air, told the Plymouth Chamber of Commerce he looked forward to inauguration of a transatlantic air route from Britain to the United States and Canada.

Probably from 45,000 to 50,000 pension applications will require adjudication by the Canadian pensions commission in the next two years, according to a return tabled in the House of Commons.

Canada recently lost a \$1,000,000 order for wheat from China because the Chinese bankers rejected "our contempt for them," Prof. C. T. Curry, curator of the Royal Ontario museum, told members of the Optimists club in Toronto.

Prof. William L. Carlyle, manager of the Prince of Wales R.F. ranch near High River, Alta., said there was a better demand for stock this year than last and prospects for general improvement in Western Canada were bright.

SKIN BLEMISHES

Vanish Before Physician's Prescription

Those spots or pimples on your face—why let them go on tormenting you? Like millions of others have done, you can get rid of your skin trouble through the use of a great physician—Dr. D.D. Dennis. Dr. Dennis' prescription—known in many countries by Campen's Italian Halm chemical—will bring you relief at once, and quickly restore your skin to health. All druggists sell D.D.D. Trial size, 35c. Guaranteed to give instant relief or money refunded.

For Smaller Ships

Battery Of Diesel Engines Are Better Than Steam

The Diesel engine has been applied quite extensively to ships. A member of the Institute of Mechanical Engineering of London suggests that for ships of over ten thousand tons steam is best. For smaller ships he would change the present system and substitute a whole battery of small Diesel engines. He would install a hundred engines of seventy-five horsepower. An engine here and there could be cut in or cut off at will. They would consume no more fuel and would stop the vibration and make no more noise than "boes on a summer afternoon."—Halifax Chronicle.

Winter— and doughnuts. Younger members of the family as well as Dad and Mother respond instantly to these delicious palate provokers. And when the doughnuts are made with **PURITY FLOUR**—crisp and full flavored—there's a delicious, distinctive quality that makes them greater favorites than ever before. That is one outstanding fact in **PURITY FLOUR**, whether it is used in cakes, pastries, breads, rolls or biscuits. Always the quality is the same, high, appetite appealing kind. **PURITY FLOUR** is protected. Only the finest of Western Canada hard spring wheat—personally selected by our representatives—is used in its milling. That's why it is possible to state that a trial will convince you that **PURITY FLOUR** is best for all your baking.

PURITY FLOUR
BEST FOR ALL YOUR BAKING

FASHION FANCIES

BUTTONS TRIP DOWN BACK OF SMARTEST DRESSES THIS SEASON—SUCH A YOUTHFUL MOOD!

By Ellen Worth

Here's a charming little dress done in black novelty jersey, a sporty type for general daytime occasions. A white longline collar completes this youthful costume. The buttons are black bone.

A gray angora plaid is another practical suggestion that is extremely youthful.

Febby crepe silk in black with white collar, purple with beetroot red or monk brown with beige you'll like especially well.

Style No. 729 is designed for sizes 14, 16, 18 years, 36, 38 and 40-inches bust. Size 16 requires 3½ yards of 36-inch material with ½ yard of 36-inch contrasting.

Pattern 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

You can have a very smart wardrobe at little expense of time and effort—our attractive Book of Fashions (price 20 cents) is just what you need. It is just into chic wearable clothes. Send for your copy to-day.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

No Argument

An amateur dramatic society in Australia was giving a show, an affair with royalty in it.

"Come," said the actor, who was playing the king, "let us go into the 'house'."

There was a titter from the boxes. "He said 'house'," an occupant remarked. The actor, overhearing, turned to the offender. "Yus, I said 'house'—do you think a king would live in apartments?"

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT

(Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Do you know what your handwriting tells about your character? And what your friends really are like? The author of these interesting articles will tell you things about yourself and your friends that will interest and surprise you. See the announcement following this article.)

I am going to devote my space this week to giving extracts from some of the interesting readings that have been mailed to readers in the past week. The problem they embrace will find a counterpart in the case of many of my readers and will, for that reason, prove particularly interesting and helpful.

J. S., Vancouver—Your girl friend is very proud and sensitive. She is probably too solicitous of other people's opinions. She is loyal—intensely so to her own personal standards. And she will expect the same rigid code from you. She will be hard to live up to, because she is relentlessly opposed to human frailty. This is not because she is essentially harsh, or callous, or lacking in sympathy. But she has probably been brought up in an atmosphere of almost puritanical conduct. I am afraid that you are going to have a very difficult time convincing her that your attitudes to the other girl were merely platonic and friendly. Just the same, I suggest that you be quite dignified about the matter. Perhaps, if you show her my letter to you, it will be of some help.

Mrs. A. Brandon—Your trouble with your husband arises from your lack of understanding and patience. You are invariably ruled by your mind. Your head dictates your views. And, so very often, it is necessary to show some of the milk of human kindness—and this comes from the heart. Do not let leavering. Your husband is having a trying time. He is undoubtedly doing his best to provide the things which you need. He is doing his best for you. And because he is unable to provide you with everything you would like, you suggest that he is ungrateful and lacking in ambition and push. Bear in mind that it is always easier to catch flies with sugar than with vinegar. Show your husband more sympathy and tolerance.

Miss C. W., Regina—The young man whose writing you sent me is a procrastinator. He lacks driving power and accepts things as they are, without looking for or expecting any improvement. He is hardly the right type of man for an ambitious girl like you. Your doubts about him show that you have already thought along this line, and I suggest that you give up expecting the impossible. The young man is not a very good type. You are still young—only 19. There is lots of time for you to find a more suitable partner.

Miss G., Calgary—I think you are troubling yourself unduly about your boy friend's feelings for you. He is not the demonstrative type. He is rather reserved, somewhat backward in showing his feelings. And because

he is not for ever telling you that he loves you is no reason for jumping to the conclusion that he is getting cool towards you. He is straightforward and sincere, is inclined to reticence, a little clammy by nature. He does not make friends easily, but will be very loyal to the few he does make. Don't worry yourself, Miss G. He would not see you so often if he did not think a lot about you.

Would you like to know the real you. Would you like to find out what your friend is really like? Merely send a letter in your normal writing, and enclose specimens of your friends' writing, stating birthdate in each case. Send 15c coin for each specimen, and enclose with 3c stamped addressed envelope to: Lawrence Hibbert, Graphologist, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. All letters are confidential, and letters will be answered as quickly as possible. Some delay is, however, unavoidable, due to the large number of letters that are coming in.

SUNDAY SCHOOL LESSON

FEBRUARY 17

PETER TEACHES GOOD CITIZENSHIP

Golden text: Love worketh no ill to his neighbor: love therefore is the fulfillment of the law. Romans 13:10. Lesson: I. Peter 2:11-17; 4:1-5. Devotional reading: Psalm 146:5-10.

Explanations And Comments

The Seemly Life, 2:11, 12. Behold, I beseech you as sojourners and pilgrims—thus Peter addresses his readers. This may be taken in the literal sense, for his readers, the Jews, were scattered throughout Asia Minor and therefore might consider themselves in exile, but probably Peter is here speaking metaphorically; he wishes them to realize that life is a journey, not a goal, and that the attainment of character which is eternal should be their aim; they were living, as it were, in exile on earth; heaven was their true home. Since they had but a short time to stay on earth, they must live their brief life nobly, by abstaining from fleshly lusts, which war against the soul, are Peter's words.

"Having your behavior seemly among the Gentiles; that, whether they speak against you as evil-doers, they may by your good works, which they behold, glorify God in the day of visitation." How like an echo from the Sermon on the Mount this seems! "Let your light shine before men; that they may see your good work, and glorify your Father who is in heaven." So Christ's pilgrim leaves a track of light behind him; he is a witness. The phrase "in the day of visitation" suggests a fear in the apostles' heart lest their response to this witness might not be immediate; it might have to hide Christ's own time. The hour of visitation which will also be the hour of illumination will come, and then all the quiet witness will be the holy walk, the patient endurance, the lofty testimony, the life that is fair to see.

Good Citizenship, 2:13-17. "The subject to every ordinance of man for the Lord's sake." By "every ordinance of man" is meant every human institution established by man for man's welfare. And the reason Peter gives is "for the Lord's sake." "Because Jesus said: 'Render what is Caesar's to Caesar,' or, generally, because God is the source of all duly-constituted authority; or because your loyalty redounds to the credit of your Master in heaven."

Has Another Use

"Copal, a form of resin, is used for Spanish making, but to the entomologist is has a different use, in that insects of past ages have frequently been found imbedded in the product in a perfect state of preservation.

From the New
PURITY COOK BOOK

Illustrated are Doughnuts, recipe number 99 in the new **PURITY COOK BOOK**. Containing 743 tested recipes, with numerous household hints and special menus, this new Cook Book, costing \$10.000 and two years of research to prepare, is invaluable in the kitchen. Easy to keep clean and lying flat at the page at which it is opened, this great kitchen help is now sent to you prepaid for 50 cents. Write for your copy today, to Dept. 629, Western Canada Flour Mills Co., Limited, Toronto, Winnipeg or Calgary.

P719

Little Journeys In Science

PHOTOELECTRONS

(By Gordon H. Guest, M.A.)

In 1887, a scientist called Hertz discovered that violet and ultra-violet light tended to cause an electric spark to start more readily. He also found that ultra-violet light causes the discharge of negatively charged bodies. Several years later it was observed that crystals of a mineral called fluorite not only became electrically charged by heat but also by exposure to sunlight or to the light from an electric arc, both of which are rich in ultra-violet light. Quartz becomes charged when exposed to sunlight, the edges of a quartz prism being alternately negative and positive. An insulated metal plate becomes highly charged when exposed to sunlight. Science has shown that every material is electrically sensitive to light, regardless of the state of that material. All substances give off electrons when exposed to a suitable source of light.

Ultra-violet light will cause solids, especially metals, to give off electrons. All such electrons which are ejected from any material by light are called photoelectrons. When light falls upon films made from the alkali-line metals, photoelectrons are ejected from these metallic films at high speed, and it is possible to measure their speed, the speed depending upon the kind of light which hits the films. Thus the blue light from the star Sirius will cause more powerful, though less numerous, electron ejections than full sunlight.

The distance which the light travels through space has nothing whatever to do with its effect when it strikes and ejects photoelectrons in photoelectric cells. Thus the light which travelled through space at the speed of 186,000 miles per second for 40 years before striking the negative pole of a photoelectric cell, to open Chicago's 1933 Century of Progress Exposition, was just as "strong" when it approached the telescope as when it left the star Arcturus 40 years before at the time of Chicago's 1893 Columbian Exposition. However, due to the great distance of Arcturus from the earth only a small fraction of the light which is radiated from that star at any instant 40 years earlier, ever reaches the earth.

Have Homing Instinct

A Kansas farmer drove his cows to a pasture twenty-five miles away. Next day the animals were back home having made the trip in thirty hours. The homing instinct which is shown by pigeons and dogs also shows itself in cattle at times.

At first sign of a cold on the chest apply a Mecca Poultice with the addition of mustard. The mustard is not necessary, as the Mecca Poultice has the properties of Mecca Ointment and will give quick relief. Full directions in each package.

FAVOR PLAN TO DEAL WITH THE DROUTH PROBLEM

Saskatoon.—Two useful points were seen by Dean A. M. Shaw, head of the Saskatchewan college of agriculture, in commenting on the proposals of Hon. Robt. Weir, federal minister of agriculture, for dealing with the drouth problem in southern Saskatchewan.

The collection of detailed information was an excellent step and he also thought that the scheme was good in that it did not call for great expenditure of public money. Many of the suggested larger schemes called for more conclusive evidence than at present existed, Dean Shaw commented.

A drouth plan similar to that proposed by Hon. Robt. Weir was recommended by a committee on agriculture reporting to the Bryant commission two years ago. Hon. J. G. Taggart, Saskatchewan minister of agriculture, said.

Dean A. M. Shaw, Dr. L. E. Kirk and Mr. Taggart were members of that committee.

The plan was recommended as a means of getting information about the best method of dealing with drouth conditions.

Mr. Taggart said there was a lack of evidence to support many ideas put forward to combat drouth. While the scheme would be valuable as a means of getting information its effects could not be felt for some years even, in the areas where the work was undertaken. The eight townships selected as demonstration townships might contain 320 farms, while the number of farms in the area affected by drouth was about 40,000.

"While these demonstrations are set up and carried on, we cannot allow these farmers to wait without applying such knowledge as we have towards their problems," Mr. Taggart said. "We propose to go ahead with our plans as once although welcoming any information that may come from these demonstrations," he concluded.

Butter Costs

Cost Of Manufacturing Found Out Creamery Butter

Saskatoon.—The average cost of manufacturing a pound of creamery butter in the prairie provinces last year was 3.65 cents and the average creamery turned out 348,432 pounds. These figures were given by C. V. Parker, economics branch, Ottawa, to the manufacturers' session of the provincial dairy convention.

Mr. Parker's survey showed the largest creameries to have the lowest manufacturing cost per pound of butter produced. Plant wages and overhead were much lower in the large plants but salaries and other administration costs were higher.

The highest cost for making a pound of butter in a creamery was 6.71 cents and the lowest 2.42 cents. The big creameries had higher transportation costs.

Application Refused

Vancouver.—Application of Attorney-General Gordon Sloan for leave to appeal to the Supreme Court of Canada from a judgment of the British Columbia court of appeal, ordering a new trial for three Indian brothers convicted of murder, has been refused by Chief Justice Sir Lyman Duff.

Indian Is Fined

Prince Albert, Sask.—Believed the first case of its kind in Canadian court history, John Smith, Jr., a treaty Indian, was convicted on a charge of carrying firearms on a game preserve. The hearing was considered a "test" case and it was believed an appeal would be launched.

Admiral Byrd Sails For Home

S.S. Jacob Ruppert, at Sea.—The second Antarctic expedition of Admiral Richard E. Byrd turned away from Little America and headed for the civilization it left behind 17 months ago.

W. N. U. 2085

Riots In Paris

Many Communists Are Arrested And Arms Confiscated

Paris.—A dramatic last-minute descent upon the capital of several thousand Communists from outlying "Red" districts was broken up by police with 1,200 "preventive" arrests to commemorate the anniversary of the fatal riots of 1871.

Confiscating pistols, clubs and cans of explosive material, police pounced last night upon Communist groups converging on the Place de la Concorde, focus of the bloody riots a year ago where 19 met death, after a generally quiet day marked only by memorial services and elaborate police precautions.

Shortly after midnight police arrested a band of 40 Communists, armed with revolvers and daggers, near the Elisee palace residence of the French president. Police said they were heading for the Place de la Concorde.

In the earlier roundups two shots were fired but nobody was hurt.

The Reds were picked up at railroad stations, subway entrances and autobus entrances on the outskirts of the city as they gathered from the "Red belt" around Paris and headed toward the centre of the city.

The Communists apparently responded to orders of their leaders to assemble at the Place de la Concorde. The Rightists sought to gather there after their memorial meeting. They came from the outlying suburbs in large groups.

Meanwhile, the Patriotic Youth organization marched 3,000 strong under police escort after an official meeting to the Arch of Triumph. There they dipped their flags in salute to the unknown soldier and dispersed. Shortly after midnight the Place de la Concorde was practically deserted.

Premier Pierre-Etienne Flandin was hoisted and hoisted, the Place de la Concorde was splashed with red paint and milling crowds clashed twice with police in minor scuffles.

Large Sum Collected

Excise Tax On Sugar Brings Over Eight Million

Ottawa.—The sum of \$8,546,119 was collected from the excise tax on sugar from last April to Dec. 31, according to a return tabled in the House of Commons. Of this total, \$8,222,675, was collected on domestic sugar sold and the balance of \$323,444 on imported sugar.

For April last, the tax was at the rate of two cents per pound, but this was reduced to one cent from May 1 under the last budget.

Royal Wedding Gown

Gown Worn By Duchess Of Kent May Be Placed In London Museum

London.—It is expected the bridal gown worn by the Duchess of Kent on the occasion of her marriage to Their Majesties, youngest son, on Nov. 29 last, eventually will be placed permanently in the London museum. The museum already holds many other similar royal robes. The dress was on view at St. James Palace for some time, along with the exhibition of wedding presents.

To Donate Park

Paris.—France will cede to Canada a 4½-acre strip adjoining the famous cemetery of Canada's war dead at Vimy, Pas de Calais, if a bill introduced by two French cabinet ministers is enacted into law. The land is used as the site for a park and monument to the memory of Canadian soldiers killed from 1914 to 1918.

Librarian Of New Bank

Kingston, Ont.—Miss Mary Rowland, graduate of Queen's University and at present assistant in the reference department at the Douglas library, has been appointed librarian of the Bank of Canada in Ottawa, and assistant to D. A. Skelton. Miss Rowland assumed her duties February 11.

Pension Applications

Ottawa.—Probably from 45,000 to 50,000 pension applications will require adjudication by the Canadian pensions commission in the next two years, according to a return tabled in the House of Commons.

WILL SUPPORT INDIA BILL

Lord Sinha, India's only peer, is expected shortly to take his seat in the House of Lords, when he will support the British Government's India Bill in the Lords' debate. Lord Sinha has been prevented from taking his seat in the House of Lords due to the fact that he could produce neither birth certificate nor a marriage certificate when his father died. The first baron married according to the Hindu custom, and it is believed that no certificates, such as are required in England, existed.

Dominion Status For India

Stated That This Is The Ultimate Goal Of British Policy

London.—A definite pledge that Dominion status was the ultimate goal of British policy in India was given by Sir Samuel Hoare, secretary of state for India, as debate opened in the House of Commons on second reading of the bill providing a new constitution for that country.

The declaration was considered as the answer of the government to criticisms levelled in many quarters against omission from the proposed bill of any mention of Dominion status.

Sir Samuel said there was no need of a preamble to the present bill similar to that of the act of 1919, which the government had no intention of repeating. That preamble was interpreted by the viceroy in 1929 (Lord Irwin) with the full authority of the government of that day as meaning that Dominion status was contemplated as the natural issue of India's progress. The present government stood firmly by the viceroy's statement and the preamble.

Students From Australia

Toronto.—Sixteen young women, students of the School of Science, Sydney, Australia, were welcomed to the University of Toronto by president H. J. G. The purpose of their visit is to gain first hand knowledge of how the schools on this continent are dealing with social problems.

ROYALISTS HONEYMOON IN NEW YORK

United in marriage at a brilliant royal ceremony in Rome, Prince Alfonso and his bride, the Infanta Beatrice, daughter of the exiled King Alfonso of Spain, are pictured upon their arrival in New York City on their honeymoon.

Merge Departments

Ottawa Legislation Contemplates A New Set-Up

Ottawa.—Amalgamation of railways and canal, civil aviation, wireless and telephone services and the Canadian radio commission under one minister is contemplated in legislation to set up a department of communications as forecast in the speech from the throne.

The measure will be presented to parliament shortly but will be preceded by acts respecting hours of work which may be brought down this week.

Few details of the merger of communication activities under the new department have been made public and complete information will have to await presentation of the measure in the House of Commons. It is known, however, that the department will have jurisdiction over telephone and telegraph rates. Inclusion of railways and canals removes the necessity of creating an additional portfolio.

Jurisdiction over the Canadian radio commission will be taken away from the department of marine and it is understood the radio-telegraph branch of that department will not be disturbed.

Other items of reform program are approaching readiness for introduction of legislation. They include establishment of an economic council, which will start shortly.

Preparing To Give Reports

Mass Buying Commission Working On Exhibits And Records

Ottawa.—Members of the royal commission on price spreads and mass buying were delving into a mountainous heap of exhibits and records, analysing statistics, studying evidence and comparing notes preparatory to writing their reports or reports. It was believed a majority and two minority reports may emerge from the commission. Examination of all the documents will occupy about three weeks, Chairman W. W. Kennedy said.

Test Proved Fatal

Madras, India.—A fatal test of a makebrite cure for acute tuberculosis was made by a brahmin here. Inspired by his deity, the triple-headed goddess Dattu, to try the cure, the brahmin ferreted out a cobra, the deadliest Indian reptile, and permitted the snake to bite him repeatedly. He died in agony shortly afterward.

Predicts Ocean Air Route

Plymouth, England.—Sir Philip Sassoon, British under-secretary for air, told the Plymouth Chamber of Commerce he looked forward to inauguration of a trans-Atlantic air route from Britain to the United States and Canada.

KIDNAPPER IS GIVEN FIFTEEN YEAR SENTENCE

London.—The week-old trial of David Meisner ended when the former Cincinnati gambler was convicted and sentenced to 15 years in penitentiary on charges connected with the kidnapping of John S. Labatt, wealthy London brewer, last August.

After deliberating one hour and 13 minutes, a Middlesex charge assizes jury composed of 10 farmers, a jeweler and a painter, brought in a verdict of guilty on each of three counts.

Mr. Justice G. F. McFarland then sentenced the bookmaker. Meisner heard the same sentence on each count, all to run concurrently.

Two counts dealt with the kidnapping—the abduction and detention of Labatt—and the third charged Meisner with armed robbery. Labatt was abducted near Sarnia last August 14. The armed robbery charge arose from the theft of \$99 from Labatt's person when he was taken captive.

Meisner's pallid face wore little expression as he faced the jurors. His mouth dropped slightly as he heard "guilty" pronounced on each count. Before the verdict was announced by Donald Bright, 30-year-old farmer, Meisner mopped his face with a mauve silk handkerchief.

Meisner's expression did not change but he leaned forward and the corners of his mouth moved nervously after the final pronouncement.

Cut In Dole Payments

Riots Staged In Sheffield As A Protest

London.—The cabinet met to consider modifying the provisions for unemployment relief under the unemployment assistance board while protests against the system were voiced through the country.

The government took note of the growing unpopularity of the "need test" regulations framed by the board and Oliver Stanley, minister of labor, ordered a "standstill" on the regulations and promised that all cuts would be resisted.

The protests took violent form as Sheffield. Nine policemen were injured and between 20 and 30 persons arrested when several thousand people clashed with police. The crowd tried unsuccessfully to send representatives to interview the city council. Stones were thrown and mounted and foot police had to charge into the crowd before order was restored.

Local communities and groups of unemployed in sections where inequalities have been charged—and hardships in some instances officially admitted—expressed demands for adjustments of the scales, which, if accepted, probably would bring about general increases in the old rates.

Coincident with the creation of the board new regulations were arranged which sliced "dole" payments in some sections and increased them in others.

A general uproar resulted. During recent weeks hundreds of sectional protests, including one demonstration in the public gallery of the House of Commons, have taken place. An estimated 300,000 persons attended various meetings in South Wales alone.

Would Destroy Fowl Poultry

Toronto.—All prize birds entered in poultry contests should be slaughtered immediately after the competition. Dr. C. H. Weaver of the Dominion experimental farm, Ottawa, told members of the Canadian National Poultry Record Association in convention here. "Only by such radical action can the spread of infection and contagious diseases among poultry be checked," he said.

Ship Fodder From North

Prince Albert.—An average of 1,500 cars of fodder a week is being shipped from farmers in the Prince Albert division of the Canadian National Railways. About 65 per cent, of the baled fodder is for export to the United States, the remainder is to alleviate the feed situation among farmers in the drought-stricken areas of southern Saskatchewan.

Egg and Poultry Producers.

A series of broadcasts dealing fully with the poultry marketing plan proposed for this province under the Natural Products Marketing Act will be given over Stations:

C F O N Calgary

FORMER STONY BANKER DIES IN THE EAST.

A former employee of the Edmonton branch of the Canadian Bank of Commerce and later manager of the branch at Stony Plain, Arthur Morton Brown, aged 55, a Toronto stock broker, died recently as he prepared to leave his home for his office.—The Edmonton Journal.

The oldtimers in Stony remember Mr. Brown, well. He was appointed manager of the local branch of the Canadian Bank of Commerce in 1907, and stayed here for several years. In 1909, when Stony was incorporated as a town, he was its first mayor, but was promoted by the bank to the position of inspector, and moved away before finishing his term as mayor. Several years later he removed to Toronto, where he held a position with the stock broker firm of Mara & McCarthy at the time of his death.

The Coming Attraction.

Mr Goodman brings to the local movie theater next Tuesday, Feb. 19th another very interesting and successful picture "Wonder Bar." In this production will be seen such stars as Kay Francis, Dick Powell, Dolores Del Rio, Al Jolson, Richardo Cortez, Hal LeRoy, Fifi Dorsay.

The attraction "The Son of a Sailor" given here on the 12th caused lots of laughs, and with the comic, combined a good two-hour show.

Obituary.

Joyce Eleanor, the 34 year old daughter of Mr and Mrs Jac Scheideiman, died of nephritis at Los Angeles, Calif. on Jan. 21, 1935.

The remains were brought here; the funeral taking place at Mewassin on Thursday, Jan. 31st. A service was held at Mewassin Reformed church The pastor Rev C H Reppert officiated. Interment was made in the churchyard.

SPORTING NOTES OF LOCAL DOWNS.

At the hockey game on the local rink Thursday night the Stony Seniors did not have much trouble beating Rexbors 13 to 3.

An Edmonton team defeated the SPH Flying Tens on the Enders rink Sunday afternoon by a score of 5 to 2. Ph. Enders refereed.

The Stony Senior hockey team did not keep its scheduled engagement with Onoway on Sunday, owing to the inability of the manager and coach to get the requisite number of players.

The contingent of curlers which Stony sent in this season to the Ronspiel in Edmonton didn't do so good—no jewelry, no medals, no loving cups.

A Test on Hog Feeding.

We are able to give here with the report of a very interesting test on feeding hogs. An Alberta farmer penned off 4 groups of hogs with 3 hogs to each group. Each group was fed on a different ration for the same period of time and all hogs were weighed in and out of the feeding pen. The results were:

Group 1—Initial wt. 122 lbs; gain 61 lbs on 150 lbs grain 78 p.c ground wheat, 10 p.c shorts 10 p.c tankage, 2 p.c salt, 410 lbs buttermilk.
Group 2—Initial wt. 120 lbs; gain 80 lbs on 150 lbs grain, 74 p.c ground wheat, 4 p.c bone meal, 2 p.c salt, 10 p.c shorts, 10 p.c tankage
Group 3—Initial weight 134 pounds; gain 90 lbs on 150 lbs grain 2 p.c mono calcium phosphate, 76 p.c ground wheat, 10 shorts, 10 tankage, 2 salt.
Group 4—Initial wt. 90 lbs; gain 94 lbs on 125 lbs grain, 2 p.c mono-calcium phosphate, half oz. Potassium iodide, 2 salt, 10 tankage, 10 shorts, 76 ground wheat.

Group 4 made the largest gain—94 lbs on the smallest amount of feed—125 lbs, the difference in the ration of group 4 being the addition of 2 p.c mono calcium phosphate and a small amount of Potassium Iodide.

Steady Progaess.

During the last year or more no publication has shown more remarkable strides in the matter of increased circulation than has The Family Herald and Weekly Star. This is not strange, for it is evident that in time of stress people are prone to cut down on the number and variety of magazines and papers coming into their homes, and they find in The Family Herald and Weekly Star a paper which, at \$1 per year, gives them every variety of reading, for old and young, all combined in this one publication. Every issue overflows with practical farming ideas, up to the minute articles, short stories, together with a weekly newspaper section which rounds out a feast of reading without compare. Truly it has been well said that The Family Herald and Weekly Star is the best for the least.

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Coronado Trail,"
"The Canyon Trail," Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically bought by the ranch and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now returns to tell Dustin and Spike Goddard, who had grumbled him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Crewe, his foreman, about his meeting with Dustin. Stone and Crewe go to Seco to send a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyroll Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

Meanwhile at the Hour Glass, Carr, Crewe, and Stone speculate as to the meaning of entries in the notebook belonging to Dane Kane that Stone had found. Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory, which proves correct, and they find the gold, as mentioned in the prospecta's notebook. As they return to the ranch, they meet Dustin leaving his house, and he deliberately tries to ride down Stone.

(Now Go On With The Story)

CHAPTER XL—Continued

Stone's half-raised bride had come down till the back of his hand struck the crest of the withers. The gripping legs closed sharply behind the forward cincha and his body swung forward to place his weight where it belonged . . . above that tremendous fore-hand, the weight-carrier. The next instant when the big black was within fifteen yards, the great Isabella horse launched himself, a living thunderbolt, against him.

The red dust swirled high above them and eddied down in a close-flying cloud and from the heart of that cloud came one sharp oath. The next moment Edith, sitting her half-crazy horse well to the side of the trail, saw . . .

TEETHING FEVER

Relieved!

Mrs. Edward James' baby had two teeth when less than three months old. She writes: "Life has been so much easier since I started giving him Baby's Own Tablets. He has cut his teeth without any trouble. Teething is a terrible trouble for both baby and mother, but the little one can always be relieved and the mother relieved by giving sweet, safe Baby's Own Tablets. Very easy to take and never causes any trouble."

Dr. Williams' BABY'S OWN TABLETS

W. N. U. 2085

She saw the great Isabella horse, bleeding at mouth and nostrils, pitching wildly as he slid to a halt. She saw Stone . . . Duro Stone, the amateur cow-puncher, who had learned his lore from Wild West fiction and who undoubtedly bought his apparel from a catalog, sitting that pitching horse like a centaur and she saw, and for one short moment did not believe her own eyes, Sam Dustin's big black lying on his side, every leg kicking wildly while his rider lay as still as death beneath him.

"Oh, my God!" she cried sharply, "you've killed him!"

"I'm afraid not . . ." Stone pitched out of saddle. "Ride on down the trail," he said sharply. "Go at once."

That strange tone in his voice made her stare. Then she went on down the trail and so missed what took place.

Stone almost leaped at Dustin's prostrate figure. A quick jab of his spurred heel made the black struggle to his feet and Duro dragged the unconscious man from the dust of the trail.

Dustin's face was cut from brow to chin and a little trickle of thin blood oozed from the cut to mingle with the dust and sweat and grime of the encounter. He was breathing heavily in great gasps and as Stone drew him clear of the horse, his head fell inertly across Dustin's arm. He laid him on his back along the path under a great mesquite bush and squatted by him.

"I'm sure sorry I didn't break your foot neck," he muttered. "I wonder if you've got anything in your pocket that'll clear things up."

His lean hands made short work of Dustin's pockets. From the inner coat-pocket he pulled a narrow pocket-book that was filled with papers that he examined swiftly but carefully. At sight of one of the papers he gave a low whistle of surprise. Then he looked again at Dustin. There was no sign of returning consciousness and after a second glance, Stone returned to a careful reading of the paper.

"Huh. It's clear enough," he muttered. "It's old Joe Carr's note for eleven thousand dollars made out to John Pegram and by him transferred to Sam Dustin. Looks bad for Carr. Looks to me like Carr got his money from Pegram; Pegram got scared or needed money, so sold the note to Dustin; then this bird, workin' with Kane, finds gold on the Hour-Glass and holds Carr's note for more than his share of the ranch. A pretty mess it looks to me. Dustin has sure got a strange hold on Carr. It looks to me as though one Gerald Keene is likely to find himself partner to Sam Dustin first thing he knows. Huh! I reckon it's time to draw cards. What else . . ."

His hands again explored Dustin's pockets and brought out a little chamouis skin bag that he opened and scanned into his hand. A little pile of glittering schist fell into his palm and a few yellow points that there was no mistaking.

"Specimens of Kane's ore, of course," he muttered. . . . "Hello! What's this?"

It was a red-and-green package of tightly rolled cigarettes that he found in a small pocket next the skin. He considered them at length. Then he carefully extracted two and placing one in his own pocket he broke the other and rubbed the contents on his tongue. He shook his head in a puzzled way. Then he pulled out the putts that he had found by the same hours before and compared them. They were exactly alike.

Very quietly and without haste he thrust his find back in Dustin's pockets and squatted on his heels till a slight movement told of the man's recovery. A moment later he sat up and rubbed a hand across his face; then his eyes fell on Stone and his face darkened under his blood and grime.

"I owe you one for this," he growled, struggling to his feet.

"That's all right," said Stone lightly. "I'm glad to do it. I saw that you wanted to show off before Edith so, I helped you. But if I were you, before you try it again, I'd take a course in riding. You can get a cook or a horse-wrangler; at some Dude Ranch to show you how to sit a horse. It only needs practice. I'd do it myself but I haven't got time. My

time seems to be taken up with tryin' to break your damned neck instead of savin' it."

The utter scorn in his voice made Dustin wince. He flushed in silence and thrust a hand into his coat pocket. His grin of satisfaction was expressive. His clothing had not been looted. He walked unsteadily to his horse that stood with drooping head and heaving flanks.

"Of course you know I'll pay you for this. If my cinch hadn't broken

"That was true enough. The rear cinch had parted."

"A weak cinch is a sure sign of mental degeneracy," said Stone. "Any good text-book will tell you to be sure of your equipment before you try trick riding."

While Dustin was staring evilly at him, he swung into saddle and thrust his great Isabella horse into full stride and caught up with Edith as she neared the house. Crewe was standing on the porch and greeted them as they rode up to the house.

"I'd just all meet up with Dustin anywhere along the trail?" he asked as Stone took Edith's horse.

"Yeah. We met him all right," said Stone. "He tried to ride me down but his horse slipped I reckon."

"Slipped nothing . . ." Edith laughed sharply. "That big black of his doesn't slip. The man tried to ride Duro down in the golpe de caballo . . . He . . . He made a mistake. That's all."

Frank Crewe asked no questions. He knew what happened when a man makes a mistake in the golpe de caballo. There a man has but one chance.

"You'd better go in the house at once, Edith," he said heavily. "Joe wants to talk with you."

She glanced uncertainly at him and stayed for the horses and as she went, Stone, seeing her eyes, could have sworn to a new light in them. The moment the door closed behind her, Crewe turned to Stone.

"Hell's broke loose at last," he said. "We know now exactly where that spook Dustin stands. Do you?"

"The last I saw of him he wasn't standin' at all," said Stone grimly. "He was lyin' in the sand with his horse on top of him . . ."

"Yeah. And because of that, you'll get a bullet through your back some dark night if you're not careful . . ."

"What did Dustin want?" asked Stone.

"He come to see Joe," said Crewe carefully. "He offered to settle the lawsuit over Soda Springs and he sure got a lot of other things, too, provided . . ."

"Yeah . . . Go on. What's the price? What's the man want?"

"Provided Edith will marry him," Crewe jerked out.

"Oh. I see . . . She ought to do a thing like that," said Stone scornfully. "Listen here, Crewe. I may be on a good trail. I don't know yet. Leave me the car. I've got to get to Seco on business for the ranch."

Crewe studied him for a moment and liked what he saw.

"Take the car," he said. "You'd better take this, too . . ."

He slid belt and holster to Stone and stood watching him as he headed for the little garage behind the bunk-house.

(To Be Continued)

Go to Glenwood, Alta.; if you wish to live to a ripe old age. With another year over, no deaths during the past 12 months were recorded and only six persons have died there in the past six years.

Too Much Uric Acid

is a very common cause of Rheumatism, Sciatica, Lumbago. Drugged kidneys allow an excess amount of uric acid to accumulate. Take Gin Pills to give relief while they are assisting your kidneys to function normally.

Here's Planned Defense AGAINST COLDS

When Colds THREATEN . . . VICKS VA-TRO-NOL If a Cold STRIKES . . . VICKS VAPORUB

At the first warning sneeze, stuffiness or nasal irritation, quick! . . . apply Vicks Va-tro-nol—just a few drops up each nostril. Its timely use helps to prevent many colds, and to throw off colds in their early stages.

BUILD RESISTANCE TO COLDS—by following the simple health rules that are also a part of Vicks Plan for Better Control of Colds. (Full details of this clinically tested Plan are in each Vicks package.)

VICKS PLAN FOR BETTER CONTROL OF COLDS

An Odd Weather Map

Shows Eight Kinds Of Air Exist Over North America

A new kind of weather map, showing eight kinds of air over the United States, was presented to aviation leaders at the annual meeting of the Institute of aeronautical sciences in New York.

The eight, discovery largely by aeroplane, are all the kinds that exist in North America. They contain, and split all the types of weather troubles known, including those on which forecasters go wrong. The map is a step in "air-mass" analysis the new system of forecasting being inaugurated by the U.S. Weather Bureau. It was developed by R. Irving Kirkick of the California Institute of Technology.

ARE YOU MISERABLE?

Mrs. A. Clarke of 78 Charles St., Hamilton, Ont., writes: "When growing into womanhood I got not much appetite, and from headaches pains in my back, and cramps. Mother gave me Dr. Pierce's Favorite Prescription. So soon as appetite improved, I had better color and pain disappeared."

New size, tablets 50 cts., liquid \$1.00.

Will Stick To Story

English Woman Claims She Owns All Of Labrador

The proprietress of a London, Eng., cold cream shop—Mrs. M. Cowan—has just announced that she owns Labrador lock, stock and barrel. Already she has cast possessive eyes on North America's most northerly 120,000 square miles, and if her lawyers are right she won't take "no" for an answer.

And here's how she bases her claims:

Her family genealogical table asserts that she is one of 300 direct relatives of a fabulously wealthy Dutch trader, one Isaac de la Penha, whose death in 1700 was a real shock to no less a person than William of Orange, King of England. The king had every reason to feel badly, too, says Mrs. Cowan, for he owed his life to the rich merchant. It seems that monarch and merchant were sailing close to each other when the royal ship sprung a leak. De la Penha rescued the king, thereby avoiding what might have developed into a decidedly unpleasant piece of business.

As a purple-hued reward De la Penha got Labrador and a standing invitation to visit with his majesty when he was in England. At any rate that's Mrs. Cowan's story, and she is bound she will stick to it—as well as the present owners of the skin her case.—Toronto Star Weekly.

Now You Tell One

Wolfhound In Frague Plays Drum And Sings

A dog that "croons" popular songs is arousing a lot of interest at Frague. The dog is a wolfhound and can sing several songs, all of the sentimental kind. It can also accompany its mistress when she sings by tapping a drum with drumsticks tied to its forelegs, and occasionally during a performance introduces a few notes on the cymbals. The dog was trained by its woman owner.

Little Hops For This Week

"Rest in the Lord and wait patiently for Him." Psalm 37:7.

"Trust in Him at all times." Psalm 42:8.

Don't thou ask when comes His hour?

Then when it shall aid thee best—Trust His faithfulness and power. Trust in Him, and quiet rest.

I had found communion with God to consist not only in the silencing of the outward man, but in the silencing of every thought, and in the concentration of the soul and all its powers into a simple quiet watching and waiting for the foot which the Heavenly Father might see fit to give or withhold. In no case could he be sent empty away, for if comfort, light or joy were withheld the act of humble waiting at the gate of heavenly wisdom could not but work patience in it, and thus render it by humility and obedience more meet to be partaker of the inheritance of the saints in light, and also more blessed in itself.—M. A. Kelly.

"Rest in the Lord, wait patiently for Him." In Hebrew "be silent to God and let Him mould thee." Keep still, and he will mould thee to the right shape.—Martin Luther.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons instead of their doctors—or remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said all drug stores everywhere. Each tiny tablet is the equivalent of "PHILLIPS' Milk of Magnesia"—the safe remedy for your child.

Remember this—And Always Say "Phillips' When You Buy. Your child deserves it for your own peace of mind, and that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of "PHILLIPS' Milk of Magnesia"—the safe remedy for your child.

Remember this—And Always Say "Phillips' When You Buy. Your child deserves it for your own peace of mind, and that you get it—Genuine Phillips' Milk of Magnesia.

Ansley on Social Credit.

A good sized assembly greeted Speaker R E Ansley when he gave an address in Stony Saturday Aft., taking for his topic "Social Credit." This "burning question of the day" was handled in an able manner, and the intricate points were made very clear. Mr D Brox was presiding.

Mr Ansley answered a number of questions at the close of his address. He strongly advocated everyone giving Social Credit serious thought and close study.

Saint Peter's Y. P. S.

Their friends in town and district turned out in a goodly number on Friday Evg. last, to greet the troupe presenting the playlet "Such a Girl." The play was one of Mr G L Wind's productions, and was charmingly presented by the visiting company. These were the members of St Peter's church Y.P.S. of Edmonton. The proceeds were donated to the Lutheran Broadcast hour. The cast consisted of the Misses L Schulz, C Hennig, M Singer, M Schenbein, L Schneider, Messrs F Ulmer, P Bistach, H Miller.

Brightbank News.

The dance put on by the Girls' club of Lucknow S. D. was a huge success, the schoolhouse being filled to capacity.

A sad accident occurred on the 5th of February, when the school children of Lucknow school were returning home and went coasting down a straw pile, the 8 year old son of Mrs J Fryer accidentally had his leg broken above the knee and had to be removed to an Edmonton hospital.

A meeting of the shareholders of Stony Plain Phone Co. was held in Lucknow school on Saturday Feb. 2, with President W Propp in the chair. The financial statement and all business documents read at the meeting showed that the board of directors were very successful and conscientious in looking after the affairs of the shareholders.

At a meeting by Bright Bank UFA Local Mr W Hodgson was chosen a delegate to the Constituency Nominating Convention to be held in Stony Plain on Saturday March 3d.

A masquerade dance will be put on by Bright Bank Local Friday March 15. Prizes will be given for the nicest also the comeliest masked ladies and gents.

A giant bald headed hen was shot by Don McDonald in Hansen's Corners district. The bird has a wing spread of 8' 4" and was shot while in the act of picking and carrying off a dead pig of about 50 lb. weight.

Mr Max B. has his house nearly completed. It looks as the another one of our popular young ladies would soon be taken off the list.

John Ducholke's Sale,
Tuesday, March 5th.

Here and There

Employed on railway construction 60 years ago, Thomas D. McGillivray, 88, of Edmonton, claims the distinction of having placed the last carload of dirt on the C.P.R. when that trans-continental line was completed to the Pacific coast in 1886. Despite his advanced age he still has a clear recollection of incidents on construction.

Miss Mary McNeill, superannuated in December after over thirty years on the Upper Lakes as stewardess of the C.P.R. Great Lakes Steamships, spent almost her entire service as chief stewardess of S.S. Kewatin, sailing with her every season from her maiden voyage in 1908 until the close of the 1934 season.

Fortunes are being spent on research in the science of armaments but not one penny for research in the field of disarmaments, said Prof. Julian Huxley, famous grandson of the even more famous Thomas H. Huxley, in outlining the meaning and functions of science, its shortcomings and possibilities, at the Lord Nelson Hotel, Halifax, recently.

"Our province will soon take an important place, if not the leading place, among the gold-producing countries of the world," stated Hon. J. E. Perrault, Minister of Resources and Development of the Province of Quebec, in a recent address on "The Mining Industry of Quebec," at the Chateau Frontenac, Quebec City.

Interviewed at Victoria recently, N. R. DesBrisay, assistant passenger traffic manager, Canadian Pacific Railway, stationed at Winnipeg, said that indications pointed to a better all-around tourist season for 1935 over 1934 much improved though that year had been over previous tourist seasons.

Skating behind a fast running horse; mushing with a team of huskies; skating or ski-ing on the mountain trails all come under the heading of real sport, is the view of Miss Dorothy Standish who reigns as Banff Winter Sports Beauty Queen during this year's season in the Canadian Rockies.

Harry Loder, tourist, travelling along a highway near Banff by car recently, saw a snake of the type by the window of his car, and reaching out caught it by the neck and pulled it into the automobile. He turned the bird over to the Banff Zoo.

A forty-mile ski race, a forty-mile snowshoe race, a motorcycle ski-joring, figure skating, ladies and men's hockey, championship speed skating, pony ski-joring, trap-shooting, ski-jumping and many swimming events in the warm pool, will be featured at the elaborate winter carnival at Banff on the week's programme beginning February 14.

Sailing recently on her fourth annual cruise around the world, which will take 150 days, with calls at thirty-three ports in twenty-four countries, Canadian Pacific Atlantic flagship, Empress of Britain, left New York with close on 400 passengers. She will return to New York late in May.

Honoring Captain A. J. Haller, R. N. R., who retired from command of the Canadian Pacific liner Empress of Canada after thirty-four years with the C.P.R. shipmates and shore-side friends presented him with an engraved wrist watch at a luncheon recently aboard the ship. Captain Haller left the sea with forty-four years of service behind him on the seven seas.

Notice to All Household and Occupants of Property.

NOTICE IS HEREBY GIVEN that by an amendment recently passed to the Town's Fire Prevention Bylaw it was enacted as follows:

"All ashes removed from any stove, grate or furnace shall be carried out in metal or other fire-proof vessels properly protected so as to prevent danger to property and shall forthwith be deposited in metal containers of not less than forty five gallons capacity. Such containers shall be provided with metal covers and shall be placed in the alley behind the lot at least two feet from any wooden structure."

Householders are required to govern themselves accordingly and to take notice that failure to comply with the provisions of the Bylaw will render them liable to the penalties thereby provided.

The Council requests the co-operation of the citizens with a view to minimizing the risk of fire within the Town.

By Order of the Town Council.
JAS. MALLOCH,
Secretary-Treasurer.
